

## Quarantine - The Soldier's Song

### Lightweight Touring Version 2 – Air Transit etc.

#### Quarantine to provide:

- 1 x PC based computer with keyboard / mouse etc in Flightcase
- 1 x Touchscreen with USB cable
- All Quarantine equipment carries a current PAT test certificate.

#### The Venue should provide:

- A space dedicated to the piece that has **no other use during the duration of the installation**. It should be a minimum of 2.5m x 2.5m and ideally not significantly larger than this. **It must have a door that can be shut**. This space must be secure when the installation is not running. It must be accessible for one wheelchair user at a time.
- Whilst it is not essential that the room is sound proofed any sound leak into the booth must be kept to an absolute minimum.
- The installation must have a dedicated usher at all times it is in operation. It will require a technician to be responsible for powering up and shutting down each day.

#### Technical:

- **1 x 42" FLATSCREEN TV, this MUST have a VGA INPUT**. This should be on a stand with it's centre at a height of 1.6m. A "UNICOL" type stand is ideal.
- A Small powered sound system including mixer. The speakers should be on stands either side of the TV with their centre at a height of 1.6m. (We use 2 x *Tapco S5 Powered monitor speakers and Tapco S10 powered sub with Tapco Mix 60 mixer*)
- 1 x Shure SM58 Microphone on Stand (Without boom)
- 1 x Dimmable light on a stand – the look of this lamp will be discussed with individual venues but should ideally look like a standard theatre Fresnel.

#### Staffing:

- Quarantine will provide a technician to set up the space. The venue should provide 1 x technician to assist, this technician will be trained to power the installation up and down etc. The installation will take approx 4hrs to set up and 2 hours to take down.

- **Other:**
